

RAZER RAIJU TOURNAMENT EDITION

MASTER GUIDE

The **Razer Raiju Tournament Edition** is the first Bluetooth and wired controller to have a mobile configuration app, enabling control from remapping multi-function buttons to adjusting sensitivity clutch options. Mecha-Tactile Action Buttons provide a soft cushioned touch with crisp tactile feedback. The Raiju Tournament Edition also delivers total control with 4 remappable multi-function buttons and Hair Trigger Mode for quick-firing action. Switch between 3 connectivity modes: PS4, USB and PC without manual re-pairing for optimal efficiency.

6. USING YOUR RAZER RAIJU TOURNAMENT EDITION

USING THE TRIGGER STOP SWITCHES

The Trigger Stops allows you to activate the Left and Right Triggers faster by shortening their travel distance and reducing their response time (Active Hair Trigger Mode). To enable the Trigger Stops, simply slide the switches outwards; and to disable the Trigger Stops, slide the switches inwards.

USING THE CONFIGURE BUTTON

The Razer Raiju Tournament Edition has a configure button which you can use to connect / disconnect with the mobile app.

Connected

Disconnected

When connected to the mobile app, you can change your controller's button mappings, vibration levels, and analog stick sensitivity clutch levels.

Default Multi-Function Buttons configuration

USING THE SENSITIVITY CLUTCH

The sensitivity clutch allows you to decrease the sensitivity of the analog sticks while the assigned button is held, to provide better aiming and handling. To use the sensitivity clutch, you will need to assign it to one of the Multi-Function Button using the mobile app.

CONFIGURING YOUR RAZER RAIJU TOURNAMENT EDITION

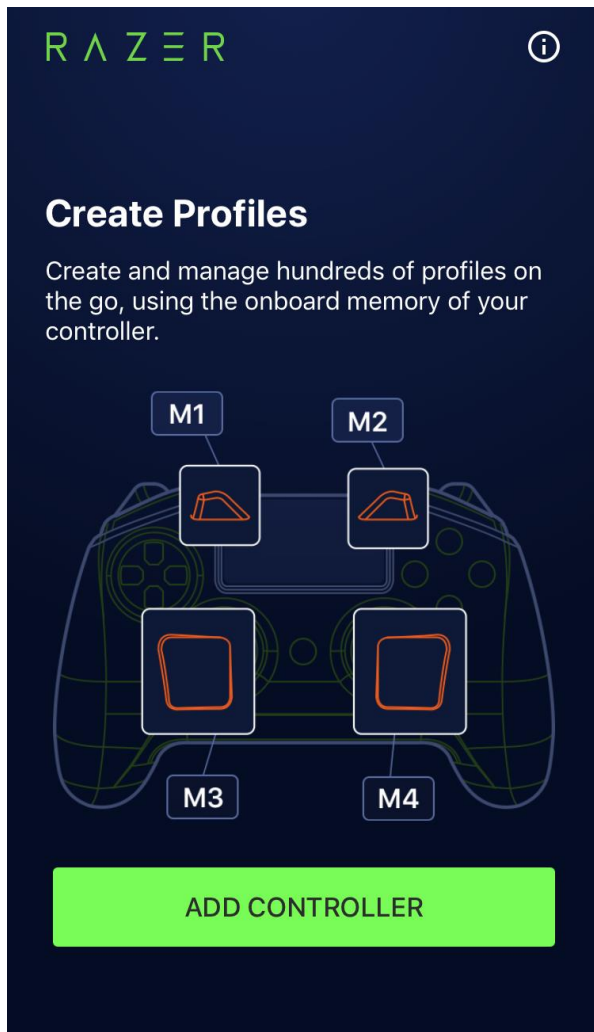

1. Download the mobile app on your mobile device.
2. Launch the app and follow the onscreen instructions.

7. USING THE RAZER RAIJU MOBILE APP

The Razer Raiju mobile app is an advanced configuration software that allows you to easily fine-tune your controller.

1. Once you have downloaded and launched the app*, you will need to add your controller. Select the controller you want to pair and follow the pairing instructions.

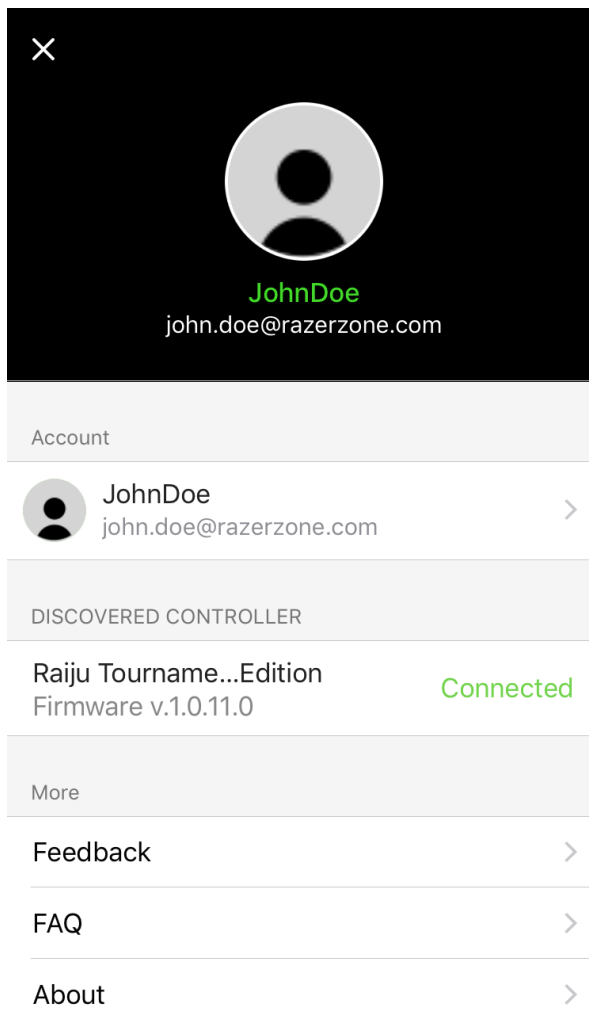

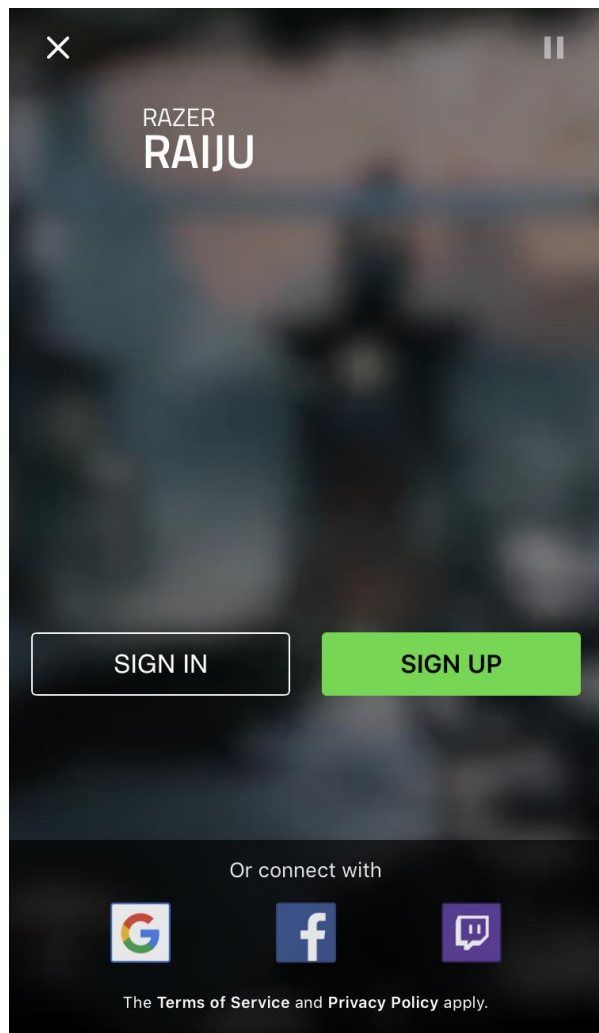

Note: For Android devices, you will need to enable Location services to use this app.

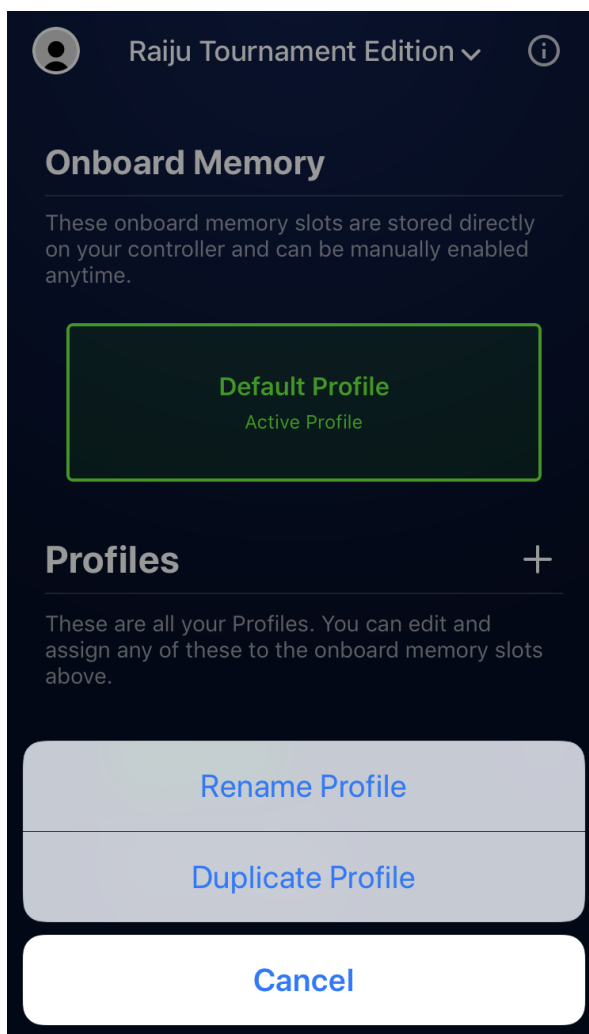

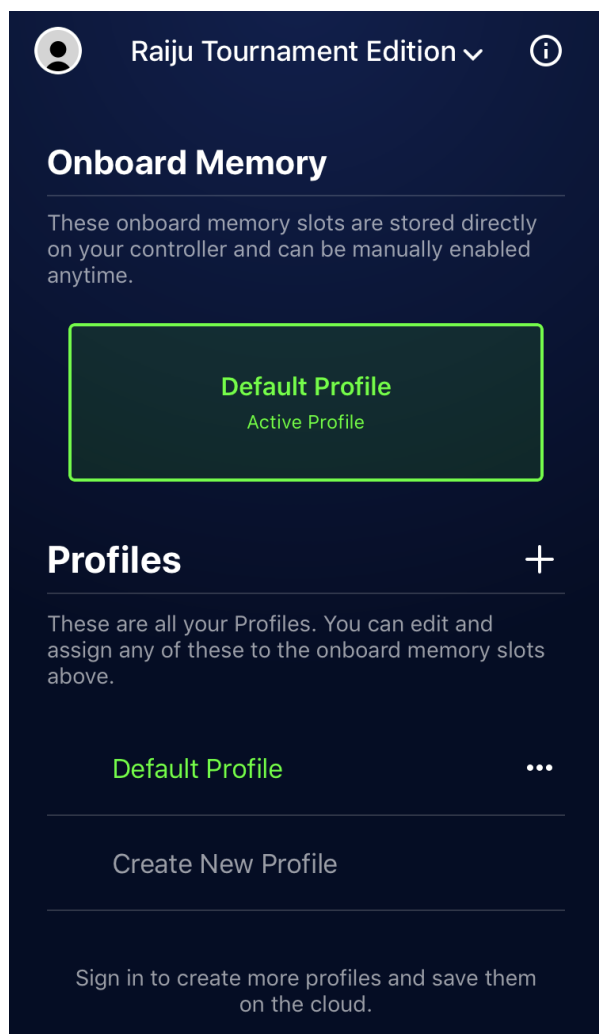

2. Once paired, you will have access to the main menu where you can create, edit, and store profiles. You can also switch controllers or reset all profiles to default using the dropdown option (▼).

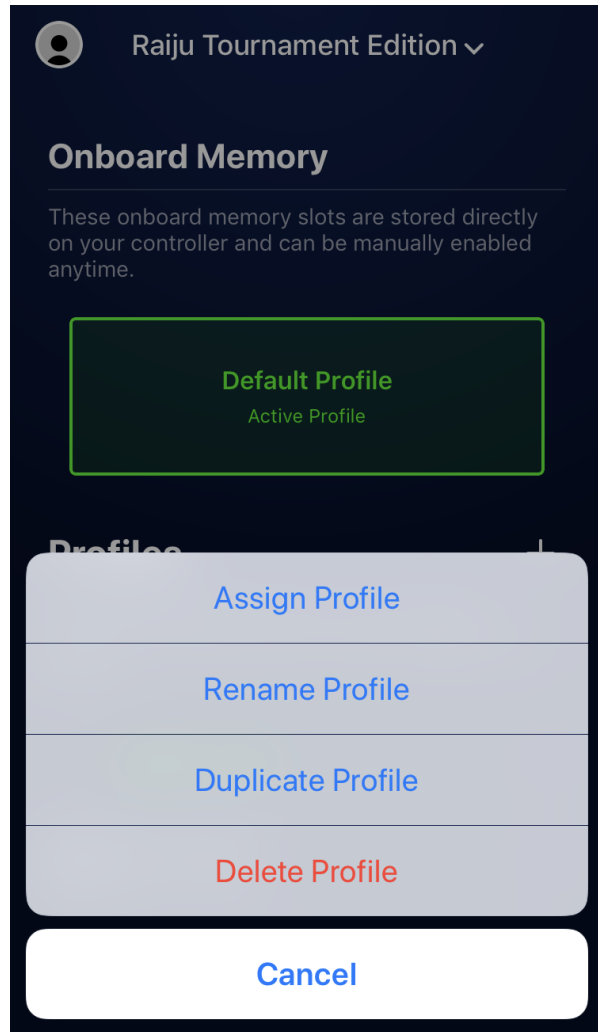

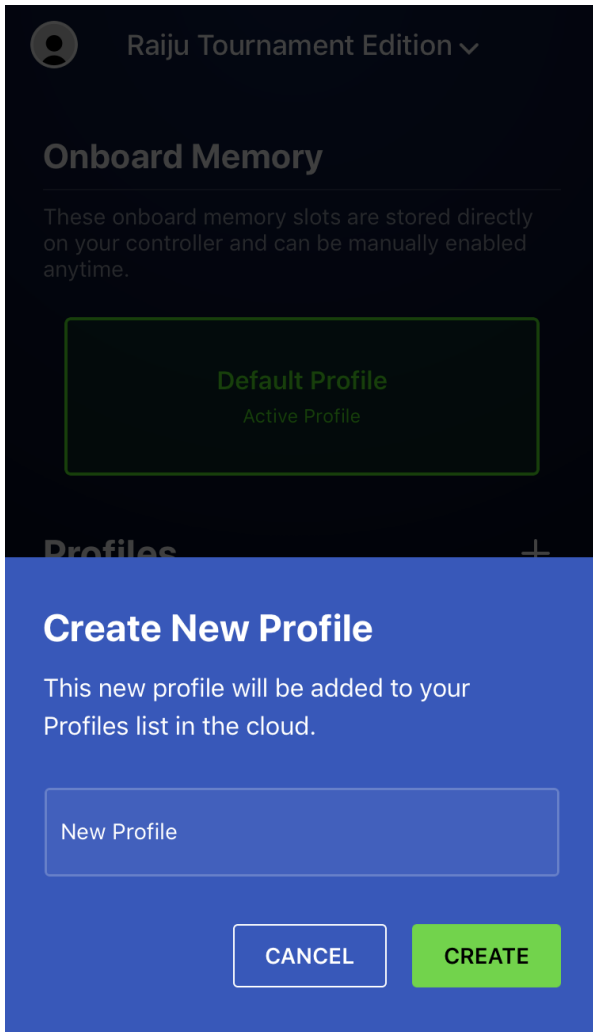

3. Sign in using your Razer ID or sign up for an account, by tapping the account icon (👤). From here, you can change your account settings, check the paired controller's status, send feedback, visit the FAQ list, view the Razer legalese, send log files to Razer Support, and sign out of your Razer ID. Once you have signed in, return to the main menu by tapping the close icon (✕).

4. To activate an onboard profile, simply select it from the onboard memory list. Selecting the miscellaneous icon (•••) allows you to rename or copy an existing profile.

- To create a custom profile, you will need to sign in using your Razer ID account* then select the add icon (+) or select an open slot from the bottom of the profiles list. Selecting the miscellaneous icon (•••) enables you to activate, rename, copy, or delete the custom profile.

Note: To learn how to sign in or sign up for a Razer ID account, [click here](#).

- To edit your controller's settings, tap any profile from the list. From the Key Mapping section, you can remap any of the Multi-Function Buttons to a PlayStation controller button or a Sensitivity Clutch.

If you have assigned an MFB to Sensitivity Clutch, further options will become available. By default, the Sensitivity Clutch is set to the middle of the slider which reduces the movement speed of your analog stick/s by half. To further reduce the sensitivity, move the slider to the left or move the slider to the right to increase it. To use the sensitivity clutch, keep the assigned MFB pressed while you move the analog stick/s.

7. The Vibrations section allows you to set the intensity of each motor on the controller.

8. SAFETY AND MAINTENANCE

SAFETY GUIDELINES

In order to achieve maximum safety while using your Razer Raiju Tournament Edition, we suggest that you adopt the following guidelines:

Should you have trouble operating the device properly and troubleshooting does not work, unplug the device and contact the Razer hotline or go to support.razer.com for support.

Do not take apart the device (doing so will void your warranty) and do not attempt to operate it under abnormal current loads.

Keep the device away from liquid, humidity or moisture. Operate the device only within the specific temperature range of 0°C (32°F) to 40°C (104°F). Should the temperature exceed this range, unplug and/or switch off the device in order to let the temperature stabilize to an optimal level.

MAINTENANCE AND USE

The Razer Raiju Tournament Edition requires minimum maintenance to keep it in optimum condition. Once a month we recommend you unplug the device from the computer or console and clean it using a soft cloth or cotton swab to prevent dirt buildup. Do not use soap or harsh cleaning agents.

Do not clean the Razer Raiju Tournament Edition with alcohol-based solutions or other solvents. Doing so may tarnish the exterior surface of the controller.
